

## Bowser: Web Scripting Genie

Automate any repetitive internet browser process.

**Like a well-trained dog retrieving the paper, Bowser can be trained to complete any repetitive browser task.**

### Bowser's Capabilities:

**Web Scripting** allows Bowser to complete any repetitive browser task, from retrieving a document on a carrier's website to completing an insurance application using data tables behind the scenes.

**Eliminate manual work** by teaching Bowser to do the work on behalf of your CSRs.

InsureZone's Fetch tool is an example of Bowser in use. Fetch retrieves policy documents from a carrier's site electronically, eliminating the need to manually retrieve the documents.
