

Clowser: Appetite and Underwriting Rules Engine

Streamline your online interface for carrier appetite & underwriting rules.

Clowser is a database interface used to maintain the appetite, underwriting rules and pre-underwriting rules provided to InsureZone by Carriers, MGAs, and others.

There are nine functions that can be performed with Clowser:

The screenshot shows the Clowser web interface with the following sections and buttons:

- Clowser** (Title)
- User Name: jergande
